

Rink Boards and Accessories for Synthetic Ice and Sport Pads

Iron Sleek manufactures boards and accessories that are complementary for companies providing synthetic ice or any type of sport flooring. We do not manufacture synthetic ice or flooring of any type, rather we cooperate with customers or contractors for building rink enclosures using our uniquely designed products.

HEAT BENT RINK ROUND

Iron Sleek also uniquely provides a heat bent 16" radius rink rounded board. This comes in 10", 20", 24" and 42" heights. The 16" radius gives a great curved appeal to keep puck live while maintaining the corner nice and tight so there is minimal loss of synthetic ice.

CAP RAIL

Take your backyard rink to the next level with our new Iron Sleet Cap Rail. Measuring 3/4" X 1.68" X 4', our Cap Rail provides a professional looking top trim that will give your rink an arena appeal. Made of high density polyethylene the Iron Sleet Cap Rail not only looks amazing but is very durable.

YELLOW KICKER

Our Yellow Poly Kicker comes in 4" and 8" sizes and is a 1/2" thick. The purpose of this is to give a clean aesthetic professional look to your rink as well as providing a smooth surface to keep pucks moving along board walls.

RINK BOARDS

The poly rink boards are 1/2" thick of durable plastic with vertical poly columns every 2 feet. In addition, the steel channels give support and temperature stability required for hockey play in the outdoors or indoors. These outdoor hockey rink boards are solid! Iron Sleet rink boards are the ultimate residential hockey rink boards because they are engineered for versatility, strength, durability, temperature stability, and superb aesthetics. The poly rink boards come 10", 20" and 42" heights.

RINK BRACKETS

The Iron Sleet synthetic ice and sport tile rink bracket comes in heights 12" and 36". The 12" bracket is for rink enclosures up to 24" high and 36" tall bracket is for boards up to 48" tall. They can be mounted into concrete or fastened into lumber. Our brackets feature a critical cut out which is essential for sports tile and synthetic ice expansion and contraction. If you are going low cost, use this bracket for homemade plywood boards or it is a great solution for mounting Iron Sleet poly steel boards.
